# Cranmore Veterinary News

## We are moving to ChesterGates!

From June , 2010 both the Cranmore and Church Farm practices will be based in Unit E, Telford Court, ChesterGates Road CH1 6LT. Tel: 0151-327-1885 and 0151-339-9141.

Cranmore Veterinary Service has undergone a major expansion at ChesterGates this past year by acquiring the building next to the original hospital. We now occupy both Units E & F at Telford Court, with the majority of the referral hospital work being performed in Unit F.

We have been in residence in the new building since the late summer of 2009. In addition to extra general purpose consulting rooms, the ground floor also houses the new rehabilitation centre with a swimming pool, treadmill, and a physiotherapy treatment area. This is an interesting development enabling us to offer you complete care for your pets from diagnosis to surgery to rehabilitation. In addition hydrotherapy is a great aid for the overweight or arthritic animal.

The Cranmore Practice has undergone many changes since it first opened in 1873. It began as a farm and equine practice and only evolved into a small animal and avian centre in the 1970's.

The next change came in 1993 with the opening of Church Farm Veterinary Clinic in Willaston and the establishing of the neurology referral centre there.

By 2004 the referral side of the practice had grown to the extent that we decided to open a dedicated referral hospital at ChesterGates. Since then ChesterGates Referral Hospital has become one of the major referral centres in the UK and one of the leading neurology centres in Europe.

By moving Cranmore and Church Farm to the new building at ChesterGates we will be able to provide the very best and advanced veterinary care for your pets.

Geoff Skerritt, *BVSc DECVN FRCVS*
